PERSONAL STATEMENT

I'm an ambitious and dedicated self-motivated individual with commercial experience in web design, web development and information technology within large and smaller commercial organisations. I'm driven to deliver effective results by applying my knowledge and expertise to a given project while working closely with colleagues to produce the best quality work possible.

I have excellent knowledge of XHTML, CSS, PHP, JavaScript (vanilla and libraries such as jQuery), and several years' experience with .NET, VB and MSSQL / MySQL. In recent years I have switched my primary focus to front end development, web performance and browser technologies.

A naturally logical thinker who excels in the art of problem solving, I build on my knowledge with research and continuous personal development. In the past I have done so in the past by attending a 13 week Princes Trust course offering teambuilding and practical skills improvement and volunteering my time and skills in design for a charity helping out victims of hurricane Katrina (2005).

CAREER HISTORY

September 2011 – Present

Lead Front End Developer / Web Design Lead

Billian I.T. Solutions Ltd

Primarily responsible for front end development but also contributing to the full development life cycle of websites and projects & for implementing, documenting and maintaining best practice procedures in all areas of the business.

PERSONAL SKILLS

I enjoy working as a team, but I am also a capable leader of projects; whether directing a team within the workplace or academic environment and effectively motivating my peers. I have strong communication skills demonstrated in my ability to break down complex problems into easily understood terms. My presentational skills are at a level whereby I can confidently present to those with professional seniority in a clear and concise manner. I have strong literacy and numerical skills as evidenced by my qualifications and also possess a keen entrepreneurial instinct.

INTERESTS

I enjoy reading and expanding my knowledge about subjects I am passionate about, such as design, web development and technology. Outside of that I enjoy going out to watch live music, comedy shows and experiencing new restaurants. I follow a few American TV shows, as well as enjoying the teamwork and competitiveness of playing Airsoft at the weekends (when the weather permits).
